## DETAILED ACTION

### *Election/Restrictions*

This application contains claims directed to the following patentably distinct species of the claimed invention:

- I. Claims 13, 14, and 16 drawn to a controller.
- II. Claims 12 and 15 drawn to a pressure sensor.
- III. Claims 17 and 18 drawn to a bolt.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 11 and 19-27 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to

be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conversation with Gene Winter on 1-3-01 a provisional election was made with traverse to prosecute the invention of Group I, claims 13, 14, and 16. Affirmation of this election must be made by applicant in replying to this Office action. Claims 12, 15, 17 and 18 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11, 13-14, 16, 19-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Nuss (4,869,419). Nuss teaches an ultrasonically agitated welding tip having a welding surface which extends in a plane (Figure 2, Item 1); a tip guide juxtaposed with the welding tip and having a guide surface extending perpendicular to the welding surface (Figure 1, Item 8); an anvil atop of the tip guide and having an anvil surface extending parallel to the welding surface (Figure 1, Item 7); and a gathering block having a gathering surface extending parallel to the guide surface (Figure 1, Item 3 and 4 and Column 10, Lines 10-15); and a controller to move the gathering block (Claim 3 and Column 3, Lines 35 through Column 4, Line 30). It is the

position that how the blocks are moved and how the controller operates are process limitations that hold little patentable weight in an apparatus claim.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jonathan Johnson whose telephone number is 703-308-0667. The examiner can normally be reached on M-Th 7AM-5:30 PM.
